FULL SIZE COMBINATION CLEANER

DEPENDABILITY MEETS PERFORMANCE.

1. Fully Opening Hydraulic Rear Door

A fully hydraulic opening and locking rear door is standard with our combos. There is no need to fight manual locks.

2. 8-Foot Long Tool Tray Storage

No need to worry about tools falling off the truck with two eight-foot storage racks, there is plenty of space to store shovels or any other tools you or your team needs out on the job site.

3. Silencer built for all

Our silencer allows you to operate this combination truck at full power while reducing noise.

4. Triplex Giant Water Pump

This triplex water pump has been a staple in the PipeHunter line for years, quickly becoming an industry favorite. This water pump combines performance, reliability and affordability.

5. Hydraulic Drive and Articulating Hose Reel

No pins or manual reel to fight with. Our hose reel articulates 180 degrees and is hydraulic driven. Adjust the speed on your articulation or the speed of the hose reel pan in/out with the simple turn of a knob.

6. Telescopic Boom

Available in 6" or 8" depending on your needs, this boom extends an additional six feet while also featuring 180 degree rotation. This flexability lets you navigate even the most problematic job sites.

7. Positive Displacement Blower Package

Our combos can be equipped with up to a 5,000 CFM positive-displacement blower. These effecient blowers allow you to tackle the majority of jobs at-or-near idle.

8. Gravity Drain / Optional Pump-Off Package

A gravity drain on the rear allows you to drain off excess liquid, while keeping the heavy debris behind.

9. Integrated Stainless Steel Water Tank

Our standard water tank is stainless steel and is integreated within the debris tank. Water capacity options range from 1,000 to 2,000 gallons.

10. Debris Capacity of 5-14 Yards

Whether you are looking for a large or small capacity debris tank, we've got options for you. Debris tank sizes range from 5-to-14 yards and we also offer an affordable **stainless steel upgrade**.

Hydro Excavation Package (Optional)

Each combination truck developed and built by PipeHunter has the option for a Hydro-Excavation package, with a 50-foot or longer, retractable hose reel. The system can run off of an indepedent water pump or off the same water pump you jet with.

MINI COMBINATION CLEANER

- POWERFUL.
- DEPENDABLE.
- NO CDL NEEDED.

1. Fully Opening Hydraulic Rear Door

A fully hydraulic opening and locking rear door is standard with our combos. There is no need to fight manual locks.

2. (Optional) Hydro Excavation Package

Includes a 50 ft. or longer retractable hose reel, 3/4" stainless steel lances and the ability to excavate at up to 3,000 PSI.

3. Dual Cyclone Separators

Dual cyclone seperators help prevent carry-over to the stainless steel final filter.

4. Triplex Giant Water Pump

This reliable triplex water pump can be 40 or 50 GPM at 3,000 PSI on 3/4" hose.

5. Control Panel

Emergency shutoff lanyard, electric throttle, boom controls & water pump/blower engage

6. Articulating Hose Reel

Our hose reel is assembled with 3/8" hardened steel and features 180 degree hydraulic-driven articulation.

7. Telescopic Boom

6" telescoping boom that rotates 180 degrees giving you ultimate maneuverability.

8. (2) 300-Gallon Water Tanks

(Two) aluminum water tanks, that interconnect to give you 600 gallons of total water.

9. Positive Displacement Blower Package

Each three-yard combo is equipped with a 3,000 CFM P.D. blower.

10. 3-Yard Debris Tank

This unit features a three-yard debris tank with a flush out bar to help with cleanup.The debris tank can also be upgraded to **stainless steel** upgrade.

HYDRO-EXCAVATION AND COMBO TRAILER

WIRELESS JET-EYE CAMERA SYSTEM

Meet the new and improved wireless jet-eye system. You can view the Jet Eye camera from up to 25 tablets at once as it heads down the line! All recording is done on the tablet itself so you no longer have to worry about pulling an SD card out of the Jet Eye system and exposing the system to the elements. Each tablet can record individually or can be used to simply view the camera going down the line. Any previous jet eye system has the ability to be upgraded to our new wireless system. All electornic components of the system are now stored within a locked, waterproof case to prevent exposure to harmful conditions.
