

PERFORMANCE

In an effort to meet environmental & safety standards, common off the shelf solvents, surfactants and degreasers tend to sacrifice performance. **SurfiSol 315** not only meets but often exceeds those standards while also achieving your performance requirements.

SurfiSol 315's most remarkable feature is its ability to break the bonds of contaminants from a surface – quickly. By maintaining this separation, it provides faster wetting, aggressive penetration and overall better cleaning while rinsing totally free.

This product is extremely effective in cleaning carbon deposits as well as a wide range of organic contaminants. Along with its high user and environmental safety rating, **SurfiSol 315** is also approved for the airline and food industries.

HEALTH

- Low toxicity
- Non-carcinogenic
- Non-sensitizing
- No aspiration hazard
- Safe on skin (non-corrosive)

SAFETY

- Non-flammable
- Non-corrosive
- No special protective gear required

ENVIRONMENT

- Readily biodegradable
- No bioaccumulation potential
- Low aquatic toxicity
- Low VOCs (Volatile Organic Compounds)
- Safe alternative to hazardous solvents
- No ozone-depleting substances
