Kässbohrer All-Terrain Vehicles (KATV) is a globally recognized leader in the design, manufacturing, and servicing of high-performance all-terrain vehicles, including snow groomers, beach cleaners, rock pickers for off beach applications, and utility tracked vehicles. Since 1969, Kässbohrer has established a reputation for delivering advanced engineering solutions, reliability, and exceptional customer support to meet the demands of extreme environments.

Kässbohrer brings expertise in developing vehicles designed to perform in diverse and challenging terrains. Our flagship vehicles, such as the PistenBully and BeachTech series, are globally trusted by ski resorts, municipalities, and industry professionals in niche markets.

Kässbohrer employs cutting-edge technology, and our vehicles are engineered for superior durability, safety, and environmental sustainability. With extensive lifecycle support, including maintenance, spare parts availability, and operator training programs, our service network ensures minimal downtime and maximized productivity.

Our manufacturing facility is ISO 14001 & 9001 certified to adhere to rigorous quality standards and prioritizes eco-friendly solutions, including reduced emissions and energy-efficient operations, aligning with modern sustainability goals.

Kässbohrer All-Terrain Vehicles is fully committed to supporting a contract award by ensuring timely delivery of products, consistent communication, and dedicated after-sales support.

With our global supply chain and technical expertise, Kässbohrer is well-positioned to exceed expectations and ensure operational success for long-term partnerships.
