

## Description

The **FLEXPOWER** MSM-200 multi-site manager is a software/hardware package which utilizes a Virtual Private Network (VPN) server to securely monitor and manage multiple LifeSafety Power network power management systems.

Through the MSM web browser interface, a user can access and monitor any LSP network power system device connected to the VPN from within a local network or via the internet from a dashboard or mobile device.

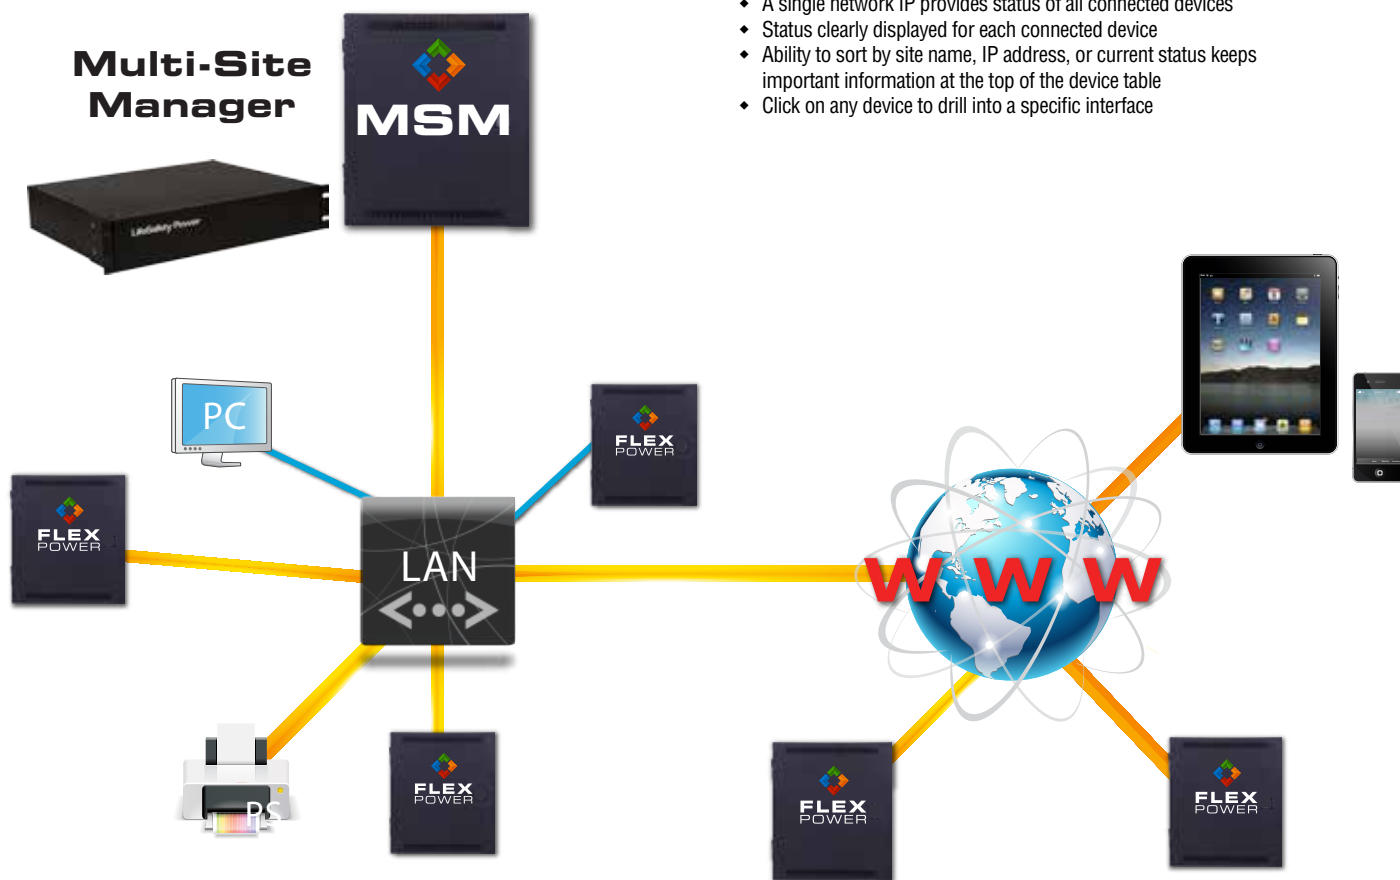

The MSM-200 VPN automatically scans and adds up to 200 deployed power systems from multiple installation sites anywhere in the world.

Available in both wall mount and rack mount options.

| Ordering | Option     | Mechanical Information                   |
|----------|------------|--|
| MSM-200  | Wall mount | Size: 14"H x 12"W x 4.5"D Weight: 14 lb. |
| RMSM-200 | Rack mount | Size: 19"W x 3.5"H x 14"D Weight: 19 lb. |

## Monitoring Features and Functions

- Provides centralized dashboard showing multiple LifeSafety Power network devices
- A single network IP provides status of all connected devices
- Status clearly displayed for each connected device
- Ability to sort by site name, IP address, or current status keeps important information at the top of the device table
- Click on any device to drill into a specific interface

## **Multi-Site Manager Hardware Description**

The Multi-Site Manager contains its own power and the ability to charge up to a 40AH backup battery to allow continued operation during power loss. A single network connection is made at the MSM Server which then creates a Virtual Private Network and automatically adds any LifeSafety Power network devices.
