- 22. Unique Entity Identifier (UEI) Number: EW8DKNBLL2W9
- 23. Contractor HAS registered and is active in the System for Award Management.

Section II, Terms and Conditions for All IT Contractors

1. Organizational Conflicts of Interest

a. **Definitions.**

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

- b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

2. Services Performed

- a. All services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.
- b. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
- c. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

3. Travel

Any Contractor travel required in the performance of services must comply with the Pub. L. 99-234 and FAR Part 31.205-46, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates apply to all Contractor travel.

4. Warranty

- a. Unless otherwise specified in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist applies to this contract.
- b. The Contractor's commercial guarantee/warranty shall be included in the Commercial Supplier Agreement to include Enterprise User License Agreements or Terms of Service (TOS) agreements, if applicable.
- d. Except as otherwise provided by an express or implied warranty, the Contractor is not liable to the ordering activity for consequential damages resulting from any defect or deficiencies in accepted items.

5. End-User License Agreement (EULA)

Contact IntelliBee for the approved EULA.

Section III, Professional Services Descriptions SINS 541611, 54151S, 518210C, and 56131

Service Title	Service Description	Minimum Education	Minimum Years of Experience	Education Substitutions
Advisory Consultant - Senior	Skilled and experienced in management consulting, process improvement, process re-engineering, project management, change management, facilitation. The Advisory Consultant is a senior level technology leader who provides technical advisory services to key decision makers, and provides design services for the technical development and integration of solutions for enterprise customers. The Advisory Consultant serves as the ultimate technical authority during a project, from scoping to customer sign-off. The Advisory Consultant has high standards of leadership – provide subject- matter- expertise for new products to the rest of the organization and actively develop junior staff within the organization through training and one-on-one mentorship.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
Advisory Consultant - Expert	Highly skilled and experienced in management consulting, process improvement, process re-engineering, project management, change management, facilitation. The Advisory Consultant is an expert level technology leader who provides technical advisory services to key decision makers, and provides design services for the technical development and integration of solutions for enterprise customers. The Advisory Consultant serves as the ultimate technical authority during a project, from scoping to customer sign-off. The Advisory Consultant has high standards of leadership – provide subject-matter- expertise for new products to the rest of the organization and actively develop junior staff within the organization through training and one-on-one mentorship.	Masters	8	Bachelors and 12 years of experience
Business Systems Analyst - Senior	Evaluates and recommend technology solutions that facilitate the accomplishment of the client's business goals. Analyzes business strategy operations and current technology architecture in order to develop options for new technologies that optimize the customer's functions and business processes. Provides consultation regarding solutions planning, impact analysis, risk assessment, and budgeting. A specialist on complex technical and business matters. Provides a leadership role through knowledge in the area of specialization.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
ERP Business Systems Analyst - Expert	Provides functional business process analysis for federal ERP systems. Duties include each aspect of traditional and Agile SDLCs. Performs issue resolution and solves complex issues, analyzes financial data, supports interface design, as well as provides training and other activities. Perform quality assurance and other oversight tasks. Responsible for developing analysis papers, analysis of alternatives, decision papers, and other project deliverables. Ability to perform duties with limited supervision; can supervise others.	Masters	8	Bachelors and 12 years of experience

Service Title	Service Description	Minimum Education	Minimum Years of Experience	Education Substitutions
Financial Analyst	Provides financial analytic support. Integrates business, cost estimating, and financial management processes to ensure the efficient management of funds. Formulates strategic financial plans, prepares cost estimates, and correlates financing requirements into executable budgets. Assesses procedures for compliance with government standards, accounting principles, and multi-tiered system application standards. Familiar with activity-based costing, business case analysis, and outsourcing requirements.	Bachelors	2	8 years of experience is equal to a Bachelor's degree and 2 years of experience
Financial Analyst - Senior	Performs fiscal or evaluation duties associated with specialized areas such as accounting, budgeting, grants administration, auditing or audit remediation. Conducts quantitative and qualitative analyses of financial information affecting financial reports and investment programs of public institutions. Review and improve financial reporting processes, performs risk assessments, develops internal controls, and recommends procedures and policies. Makes recommendations and implements creative solutions to financial problems. Develops and maintains financial data and analytical tools to support asset valuation and financial reporting. Responds to external audit requests and support remediation of audit findings.	Bachelors	4	10 years of experience is equal to a Bachelor's degree and 4 years of experience
Program Manager - Senior	Provides management for operations at a program and/or contract level. Oversees all phases of the project lifecycle at a program and/or contract level, to include initiation, planning, execution, monitoring, and closure. Provides oversight and leadership to such activities as organizational development, project management, strategic planning, analysis, and evaluation. Maintains productive and effective relationships with client organization through regular communication, stewardship, and outreach. Ensures performance objectives are met in accordance with contractual requirements. Ensures deliverables and services conform to quality standards. Holds status meetings and reviews status reporting. Leads problem resolution at program and/or contract level to include analysis, mitigation, and solution.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
Project Manager - Senior	Supports, leads and/or oversees all phases of the project(s) lifecycle to include initiation, planning, execution, monitoring, and closure. Serves as a point of contact for project staff and client lead. Ensures project scope and objectives are met per contractual requirements. Develops, maintains, and revises project artifacts to include project plans, budgets, and schedules. Leads project meetings and status reporting both written and verbal. Oversees and manages all project resources (onsite and offsite) to include direct, subcontractors, and consultants. Ensures conformance to quality standards and contractual requirements for all project deliverables. Supports problem resolution to include analysis, mitigation, and solution.	Bachelors	3	9 years of experience is equal to a Bachelor's degree and 3 years of experience

Service Title	Service Description	Minimum Education	Minimum Years of Experience	Education Substitutions
Research Analyst	Performs research-related tasks of some technical complexity, applying standard and established theories, concepts, methods and techniques. Assists with the development of study design, sampling strategies, and analytical plans. Contributes to the development of artifacts and documentation to include guidelines, protocols, reports, manuscripts, and publications. Possesses an applied understanding of industry methods and techniques common to the field. Command of systems, tools, and technology to collect and analyze data.	Bachelors	2	8 years of experience is equal to a Bachelor's degree and 2 years of experience
IT Cyber Security Analyst - Senior	Reviews and provides recommendations for security assessment plans and results, creates plans of action and milestones (POA&Ms), prepares and documents findings, assists with the certification and accreditation process. Assists the engineer at times with conducting system analysis, design, development, test and evaluation activities, ensuring the integration of software, hardware, reliability, maintainability, safety, survivability, human and other requirements in the total security engineering effort. Identifies requirements and participates in information analysis, cost-benefit analysis, system trade studies, and risk analysis. Assists in the selection of system architecture components, allocating requirements and preparing specifications.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
IT Cyber Security Engineer	Performs security assessments, conducts system analysis, design, development, test and evaluation activities, ensures the integration of software, hardware, reliability, maintainability, safety, survivability, human and other requirements in the total security engineering effort. Formulates operational concept, performs mission and functional analyses, conducts requirements and information analysis, cost-benefit analysis, system trade studies, and risk analysis. Selects system architecture components, allocates requirements and prepares specifications.	Bachelors	2	8 years of experience is equal to a Bachelor's degree and 2 years of experience
IT Database Administrator	Expertise in database design, maintenance, and data architecture. Responsible for data analysis and database management. Experienced in maintenance, enhancement, designing of data dictionaries, physical and logical database models, and performance tuning. Range of skills and knowledge of the utilities and production tools used for data storage management to support an Application Team. Tasks include: . Skilled data dictionary analysis and design and data model analysis design . Maintain central data repository . Experience and knowledge in supporting application system development life cycle . Responsible for data dictionary backup and recovery . Responsible for definition of standards of data dictionaries . Program dictionary analysis and maintenance software . Perform performance tuning	Bachelors	2	8 years of experience is equal to a Bachelor's degree and 2 years of experience

Service Title	Service Description	Minimum Education	Minimum Years of Experience	Education Substitutions
	<ul style="list-style-type: none"> . Monitor database performance and space requirements . Schedule and monitor end of day data warehousing jobs . Assist in coordinating software releases. . Communicate accurate and useful status updates . Follow quality standards . Strong communication skills; both written and spoken 			
IT Documentation Manager	Responsible for providing expertise and project support to facilitate access to information across multiple work environments; promoting and supporting best practices in developing and managing knowledge, information, records and archives. Develop software or customize software for client use with the aim of optimizing operational efficiency. Analyze and design databases within an application area, working individually or coordinating database development as part of a team. Supervise computer programmers.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
IT Software Tester - Senior	Design, implement, and conduct test and evaluation procedures to ensure system requirements are met. Develop, maintain, and upgrade automated test scripts and architectures for application products. Write, implement, and report status for system test cases for testing. Analyze test cases and provide regular progress reports. Serve as subject matter specialist providing testing know-how for the support of user requirements of complex to highly complex software/hardware applications. Direct and/or participate in all phases of risk management assessments and software/hardware development with emphasis on analysis of user requirements, test design and test tools selection.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
IT Systems Administrator - Senior	Responsible for the internal or customer administration, maintenance and management of capacity resources for computers at the operating system and infrastructure level. Builds, configures, troubleshoots and integrates new and existing servers to provide service enhancements, application deployments and infrastructure upgrades. Recommends software and hardware enhancements, diagnoses and corrects issues, defines and implements new services with the goal of achieving maximum server uptime and availability for the customers. Responsible for monitoring performance, system usage. Contributes towards the Disaster Recovery Plan (DRP), backup systems and disk configurations. Conducts system analysis and development to keep systems current with changing technologies.	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
IT Systems Analyst - Senior	Provides expertise in developing systems involving new technologies, methods, concepts or approaches. Provide supervisory, technical, and administrative direction for personnel performing system development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, and for progress in accordance with schedules. Formulates statements of management, scientific and business problems, and devises procedures for solutions of problems. Performs required analysis of information management and data requirements, develops test plans, procedures and data, and evaluate system, effectiveness and efficiency. Performs system	Bachelors	5	11 years of experience is equal to a Bachelor's degree and 5 years of experience.
