

DIRECTOR'S MESSAGE

Building on recent enhancements to our cooperative contracts, we are proud to announce the new **AI Consulting Services Contract:AI05-26**.

This contract connects HGACBuy members with qualified, experienced, and vetted AI consultants who can guide organizations through every stage of AI exploration, planning, design, and deployment. Whether your team is just beginning to explore AI or ready to expand existing capabilities, these awarded suppliers provide the expertise to help you navigate the possibilities with confidence.

Our commitment to excellence continues as we support members with innovative solutions and services.

Ronnie Barnes
Director of Enterprise Solutions
HGACBuy

CONTRACT OVERVIEW

Contract Name: AI Consulting Services

Contract Number: AI05-26

Contract Dates: May 1, 2026 – April 30, 2030

Contract Overview: This contract provides access to consulting services that help organizations evaluate, implement, and optimize Artificial Intelligence (AI) and Business Intelligence (BI) solutions. Contractors offer expertise across a range of services, including:

- Artificial Intelligence (AI) strategy, planning, and implementation
- Business Intelligence (BI) platform administration and optimization
- System architecture and solution design
- Dashboard and data visualization development
- Data operations and analytics support
- Continuous Integration (CI) and Continuous Delivery (CD) implementation for BI assets
- Automated testing and quality assurance processes
- Code reviews and development best practices
- Documentation development and standards management
- Data lineage tracking and management
- Data governance and compliance support
- Data security assessments and improvements
- Analytics modernization and process optimization

EMPOWERING MEMBERS TO LEAD WITH INTELLIGENCE

Artificial Intelligence is no longer an emerging trend. It's an essential tool for modern public service. From streamlining operations to improving service delivery and decision-making, AI has the potential to transform how communities work, plan, and grow.

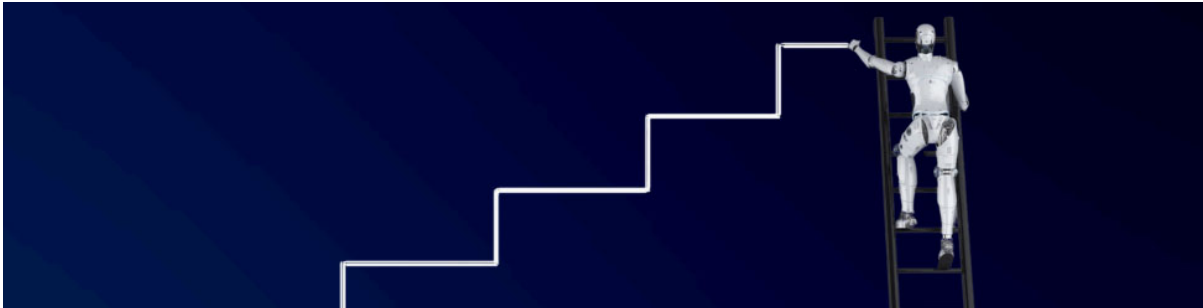

But unlocking that value requires more than technology alone. It requires **expert guidance, responsible implementation, and strong guardrails** to protect the privacy, security, and intellectual property of every organization involved.

RESPONSIBLE AI IS SMART AI

As we embrace AI's potential, protecting sensitive information must remain at the center of every implementation. The suppliers under AI05-26 follow industry-recognized standards to:

- Ensure **privacy controls** are in place
- Safeguard **intellectual property and proprietary data**
- Limit and monitor how data flows into and out of AI systems
- Establish **guardrails** that maintain accuracy, reliability, and accountability
- Help members remain compliant with state, federal, and agency-specific requirements

AI can accelerate progress, **but only when it's implemented with care**. This contract gives you a structured, secure foundation to do exactly that.

WHY NOW AND WHY HGACBUY?

As public needs grow more complex, the demand for responsive, data-driven, and cost-effective solutions grows with them. AI is one of the most promising tools available and HGACBuy makes it easier, faster, and safer to implement.

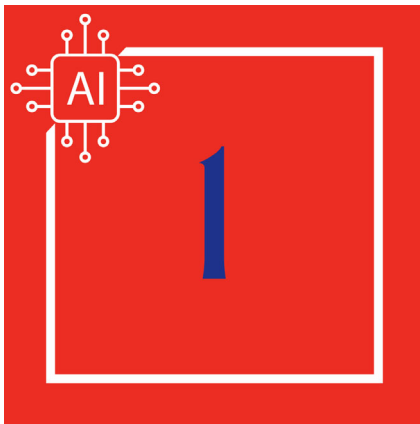

We connect you with proven partners who meet rigorous standards, enabling them to:

- Reduce procurement time
- Access competitive pricing
- Avoid unnecessary risk
- Focus on delivering results for your communities

You can do anything, but not everything. Partnerships, especially smart, strategic partnerships, are how we move forward together.

GETTING STARTED WITH AI

AI doesn't have to be overwhelming. Start small, start safe, and start with intention.

Identify Your Pain Points

Ask:

- What processes slow us down?
- Where do we have repetitive work?
- Where do we need better insights?

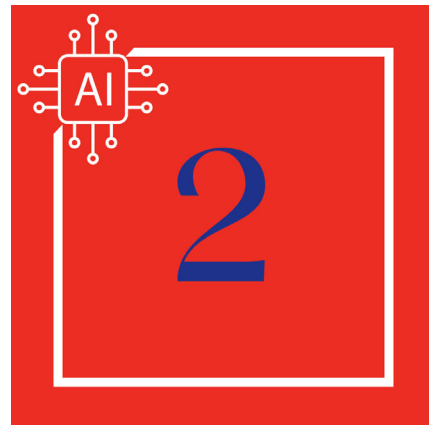

These are prime AI opportunities.

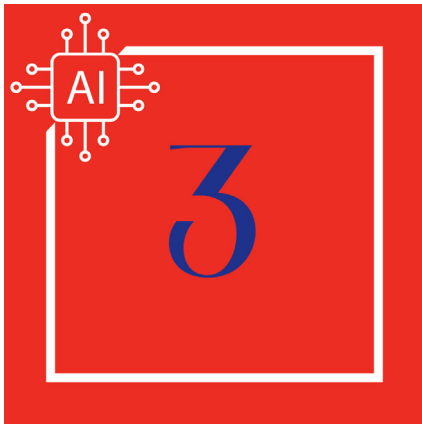

Protect Privacy and IP From the Start

Before using any AI tool:

- Know what data you're putting into it
- Classify data sensitivity
- Prohibit entry of confidential or regulated information

Guardrails protect you *before* problems happen.

Build an AI Use Policy

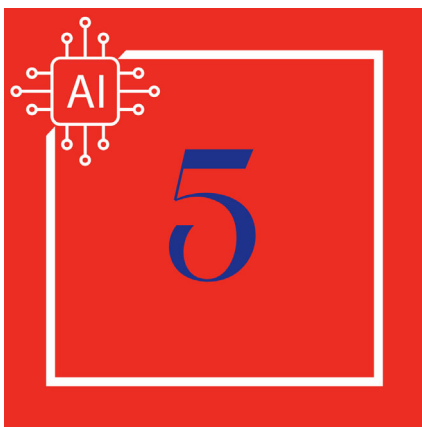

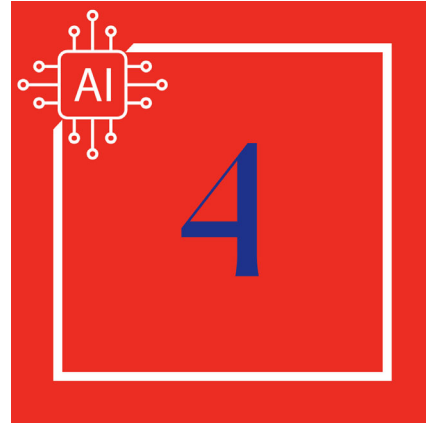

Your organization should establish expectations for:

- What AI tools can be used
- What data is allowed
- Required approvals for new tools
- Staff training

AI works best with clear, shared rules.

Start With a Pilot Project

Choose something meaningful but manageable like reporting automation, triage workflows, or dashboard generation.

Bring in Experts

The suppliers awarded in AI05-26 can guide you through planning, risk review, and implementation. This keeps your organization secure, compliant, and future-ready.

WHAT AI05-26 SUPPLIERS OFFER

Our suppliers bring deep knowledge across AI strategy, development, and governance. You can look to them for support in areas such as:

- Identifying where AI can enhance existing or future business processes
- Platform administration and optimization
- System and workflow design tailored to organizational needs
- Dashboard development and automation of data processes

In addition, our suppliers are a key source for technical best practices, including:

- Data operations and lifecycle management

- Continuous Integration (CI) and Continuous Delivery (CD)
- Automated testing and version control
- Code reviews and documentation standards
- Data lineage tracking and governance
- Security and compliance improvements

Their mission is simple. Help our members safely, strategically, and effectively take advantage of the opportunities AI offers.
